KEY FINDINGS *The numbers that drive the story*

40%

Late aircraft is the #1 delay driver

39.84% of all delay-minutes come from late-arriving aircraft — a cascade, not isolated incident.

Overview · Delay by Cause

54%

Weather drives the cancellations

Of ~90K cancelled flights, weather is the majority — winter & peak-summer storms.

Airport · Cancellation Reasons

6-8 "P-M"

Delay compounds all day

Avg departure delay climbs from near-zero at dawn to its peak in the evening.

Temporal · Delay by Hour

June

Summer is the worst month

June peaks at 9.6 min avg arrival delay; Sept–Oct run smoothest, near zero.

Overview · Monthly Trend

RECOMMENDATIONS *Data-backed actions for stakeholders*

1

Protect aircraft turnaround buffers at hub airports

Late-aircraft delay is 40% of all delay-minutes and concentrates at busy hubs. One morning slip cascades across every downstream leg.

▲ High impact

● Medium effort

Airlines

2

Build weather contingency into seasonal schedules

Weather causes 54% of cancellations, and June (9.6 min) & February are the worst delay months.
